3.15	Winning Photo announced [Intro to RAW – if time] Q & A
3.45	CLOSE

\* Times subject to variation, depending on venue

### **Workshop outline**

If you appreciate the magic of the garden but have struggled to capture its qualities on camera then this is the workshop for you. Ray will explain the most useful features on a digital camera and run through a range of techniques to help you get the best out of your equipment. You will be able to take your camera into the garden and apply what you've learnt. Participants' photos will then be viewed and discussed with the whole group.

### **Who is the workshop for?**

Anyone wishing to improve their digital photography of gardens and plants should benefit from this course. An understanding of the basics of photography would be an advantage.

### **What do I need to bring?**

**Digital camera:** ideally a DSLR or 'bridge' camera which offers the user a good level of control over its functions. People with 'point-and-shoot' compacts are also welcome, and while they may not be able to undertake all the techniques covered during the day, they will learn how to become more creative with their camera.

**Memory card;** NB please ensure this is empty ie you have removed old pictures from the card

**Manual** for your camera

**Outdoor clothing & footwear** suitable for use while photographing the garden

Bring the following if you have them (don't worry if you don't):

**Tripod**

**Lenses** (in addition to standard lens e.g. telephoto, macro)

**Remote shutter release**

Other **accessories** you consider useful e.g. polarising filter, diffuser, reflector

*From time-to-time we offer **multi-day Workshops** and **Photography Tours**; when available please see corresponding link/s on News page of website ([www.rcoxgardenphotos.co.uk](http://www.rcoxgardenphotos.co.uk))*
